

# BRANCH CANDLE

The Ravenscourt Park edition comes in a spectrum of nine colours: Naples Yellow, Saffron, Minium, Vermilion, Cochineal, Cambridge Brown, Avocado and Terre Verte (pictured).

Inspired by close observation of nature and a desire to use natural materials, the Branch Candle brings the beauty of the outdoors into your home.

Using traditional candle-making methods and combined with modern mould techniques, we captured the exquisite organic details - the bark, nodes, and texture of the tree's branches.

The Branch Candle is made from 100% beeswax and cast from tree branches found on our daily walks. Editions are titled based on the setting of the tree.

The many advantages of beeswax are it is a natural, renewable resource that burns a smokeless flame, lasts longer, drips less, and naturally emits a sweet, subtle honey fragrance. We chose to use beeswax because it is more environmentally friendly than candles made of paraffin, GM soy wax, and synthetic fragrances, which emit toxins.

The candle is sustainability made, cast in our London studio. The packaging is made and hand-printed locally on post-consumer recycled British cardstock, held together with a staple.

**Study nature, love nature, stay close to nature.  
It will never fail you. — Frank Lloyd Wright**

Ilex Studio was founded in 2018 with a design focus on creating products that highlight and celebrate the beauty of nature.
